

Risk Assessment for Peddlers

Assessed by Dominic Schrader

Risk	Person who might be harmed	Risk controls in place	Severity of risk (S)	Likely-hood of risk (L)	Overall risk (R)	Further actions necessary to risk
Someone falling out of boat	Participant	Instructors instructions given to participants constant supervision working in shallow water so Participants can stand in it	2	1	1	Continuous supervision
Someone getting his or her hand trapped in manually operated propeller.	Participant	Instructors instructions given to participants constant supervision	1	1	1	
Dirty water	Participant /instructor	Clean water and boats after use	1	1	1	

S= Severity (1=minor 2=serious 3=major) effects of hazard.

L= Likelihood (1=unlikely 2= possible 3= likely) likelihood of harm occurring
